PUTTING ENERGY SAVINGS TO WORK

- View All Case Studies -

The Energy Services Coalition is a public private partnership promoting the benefits of providing education on, and serving as an advocate for the widespread use of energy performance contracting in public and private facilities. The ESC provides a unique forum in which all stakeholders can work together to address and overcome any barriers which are limiting the effective use of ESPC.

PUTTING ENERGY SAVINGS TO WORK -- SINCE 1995

The Energy Services Coalition Board of Directors is pleased to announce the launch of our newly redesigned website. Our new website is a blend of industry news, programmatic tools, ESPC case studies and more.

Energy Services Coalition (ESC)

Hawaii's Kapiolani Medical Center has agreed to a \$2.4 million ESPC. The energy upgrades - including a new central cooling and heating plant, lighting upgrades and energy management and control systems - are scheduled for completion in September; the project will generate approximately 3.0 million kWh of electricity savings and 11,000 therms of natural gas savings. This translates into an expected annual savings of more than \$1 million.

14 Energy Services Coalition

Since our inception in 1995, the ESC has played an important role in supporting and facilitating the development and implementation of energy savings performance contracting programs in states throughout the country. Learn more [here](#).

Energy ESC

Today, the ESC has a network of 30 state chapters located throughout the country. These state chapters reflect the same public/private partnership approach as the national organization. The main mission of state chapters is to provide statewide on-the-ground education on performance contracting.
